### About Me

As a front-end web developer, I have a passion for creating intuitive, user-friendly, and responsive websites. My skills include HTML, CSS ,Tailwind,Bootstrap JavaScript and React. I also have experience with version control systems like Git and GitHub. I specialize in crafting exceptional, responsive web designs that seamlessly adapt to various devices.Right now, i want to become a MERN stack developer.

### Professional Experience

#### Code's Thinker Pvt Ltd. | Frontend React developer

August 2024 – present

*As a dedicated Frontend React Developer, I have had the opportunity to contribute to the development of a comprehensive school management system at my current company. In this role, I have:*

- *Designed and implemented user-friendly interfaces using React, Redux, and other frontend technologies.*
- *Collaborated with cross-functional teams to gather requirements, define the scope of features, and ensure timely delivery of project milestones.*
- *Conducted thorough testing and debugging to ensure the stability and performance of the system.*

*Specifically, I have worked on the following features:*

- *Developed a teacher management module, where I:*
  - *Created a user interface for adding, editing, and deleting teacher data.*
  - *Implemented a system to track which subjects each teacher teaches and which students they are assigned to.*
- *Designed and developed a student records management system, where I:*
  - *Stored student records, including their academic performance and other relevant information.*
  - *Implemented a system to track student fees, including payment records and outstanding balances.*

*In addition to my work on the school management system, I have also contributed to other exciting projects, such as:*

- *Developing a fun and engaging hamster combat game, which involved creating dynamic animations, sound effects, and user interactions.*
- *Enhancing the user experience of CodeLan, a website for coding enthusiasts, by implementing new features and optimizing existing ones.*

#### Enigmatix Pvt Ltd. | Frontend web developer Intern

Nov 2023 – june 2024

- Proficient in HTML, CSS, JavaScript, Tailwind, and React
- Experienced in using Git and GitHub for code management and collaboration
- Recreated Amazon's key features, demonstrating e-commerce design and functionality
- Designed a personal portfolio website to highlight projects and skills
- Showcased creativity in UI/UX design and layout
- Developed a functional stopwatch with start, stop, and reset features
- Created a Celsius-Fahrenheit temperature converter with a user-friendly interface
- Utilized animations to enhance user engagement

#### Volunteer. | Computer Science Student Club IUB.

OCT 2023 – present
